WEIGHT LOSS PRODUCT SOLUTIONS

Clinically Validated Products:

DNF-10 Offered through integrative peptides

DNF-10 is a new ingredient promoting weight management through a regulation of the mediators of satiety, proven with 4 clinical studies. Obtained from a screening of small molecular weight peptides after proteolysis of *Saccharomyces cerevisiae*, a daily intake of 500mg significantly decreased caloric intake after 1 week, resulting in significant body weight loss after 4 weeks. Measured by computed tomography, the weight loss is from a reduction in fat mass.
